

Environmental Policy

Smartkidz Play and Learn Ltd is committed to the protection of the environment through reducing pollution, emissions, and waste as follows:

As part of the induction process, and through staff meetings and training, our staff will be informed about reducing the use of raw materials, supplies and energy.

We raise the children's awareness of environmental issues through discussions, projects and day to day activities within the club.

Children and staff follow Smartkidz Play and Learn 'Eco-Code:

- We re-use and recycle our waste material as 'loose parts' play materials wherever possible.
- Where waste materials present an unacceptable risk for use by children in their play, we use the school's recycling bins whenever possible.
- We switch off lights when not in use.
- We turn off electrical equipment at the power source when not in use.
- We turn off taps after use and do not waste water.
- We do not drop litter.
- We promote using the outdoors throughout the year and believe that this helps children to respect the environment.
